# Glossary

White light (included)		Artificial plants included
Warm light (included)		Cherry bulb included
RGB light (included)		Solar panel
Led bulb (not included)		String
Led tube Lighting		lumens
Flame effect led light		Packaging
Remote control		Weight
Dimmable		Solar + electric charge
Touch control		Electric charge
Twilight sensor		Solar charge
Motion sensor		AAA batteries
Hanging product		Hardwire
Play music		Cable
Integrated speaker		Jute Cable
Main Material		Magnetic
Floating, not submersible		Connectable
Floating & submersible		Timer
Planter volume		Indicates the level of protection of the electrical or electronic equipment against the entry of external agents: dust or water
Includes water reservoir		IP

# Polyethylene Textures

Newgarden's products made of polyethylene have a visually smooth and softly granulated finish that is very pleasant to the touch.

Certain products may feature a blend of various materials, and in such instances, we will identify and highlight the predominant material in the product.

(\*) To ensure optimal maintenance, it is essential to shield these items from rain, direct sunlight, and abrupt temperature changes. Natural materials such as bamboo, rattan, beechwood, or seaweed may undergo color changes or develop cracks over time. When exposed to natural elements, it is advisable to regularly apply a suitable oil or varnish for each specific material. This not only extends protection against rain and UVA rays but also enhances the product's longevity. For cleaning, use a cloth or a brush to eliminate dust, and gently rub with a slightly moistened sponge.

# Use according to IP

Here you can find information about the possible uses of Newgarden's products according to their IP (index of protection of the electrical or electronic system against external agents)

IP20

Newgarden's products with IP20 can only be used indoors, the electrical system, switches or cables must be protected from direct contact with water. Note that, although the product is made of Polyethylene, which is resistant to external agents, the electrical system is designed for **indoor use only**.

IP43

Newgarden's products with IP 43 / 44 can be used outdoors, it is protected against dust and weak and very moderate rain. **If this product also have accessories made of natural fibres, wood or metal parts, it is advisable to protect it from direct contact with water and humidity.** Store it in a dry place after use. In the event of rain or very adverse weather conditions, it should be protected from these external agents to avoid future problems.

IP44

IP54

Newgarden's products with IP 54 **can be used outdoors, as they are protected against dust and light rain.** If this product also has accessories made of natural fibres, wood or metal parts, it is advisable to protect it from direct contact with water and humidity. Store it in a dry place after use. In case of rain or very adverse weather conditions it must be protected from these external agents to avoid future problems.

IP65

Newgarden's products with IP 65 **can be used outdoors, they are airtight against dust and rain.** If this product also has accessories made of natural fibres, wood or metal parts, it is advisable to protect it from direct contact with water and humidity. Store it in a dry place after use. In case of rain or very adverse weather conditions it must be protected from these external agents to avoid future problems.

IP67

Newgarden products with IP67 are dust-tight and rainproof. They are also floating (submersion is not recommended) so they can be used in swimming pools. They must be protected against very adverse weather conditions.

IP68

Newgarden products with IP68 are dust-tight and rainproof. They are also floating and submersible (according to each product's own instructions for use) so they can be used in swimming pools. They must be protected against very adverse weather conditions.

The possible differences between the original color, illumination and color captured are due to the printing technique.
